

CC6750 ULTRA PERFORMANCE ENERGY SYSTEM CLEAR

CLEAR BENEFITS

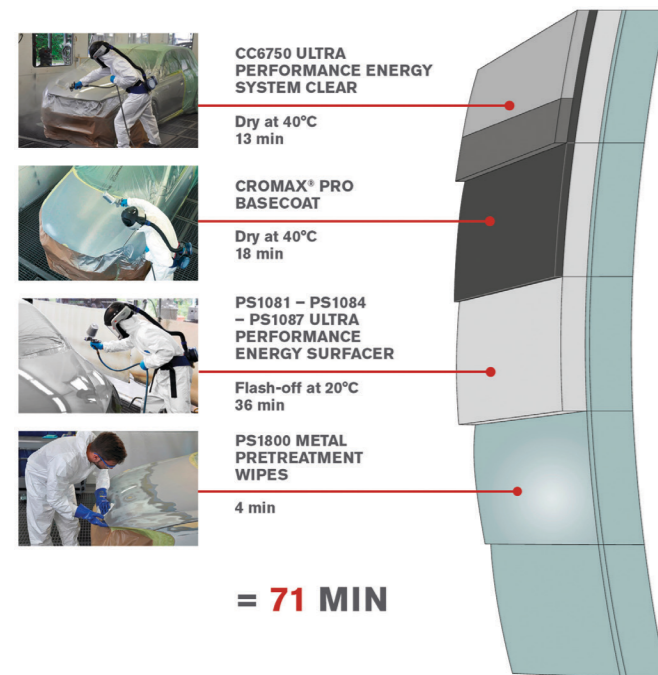

MAXIMISE REFINISHING EFFICIENCY

Our system is the fastest product solution on the market in terms of process speed.

MAXIMUM THROUGHPUT

STANDARD REPAIR IN AROUND 1 HOUR

*71 minutes repair time is based on a standard repair of 3 panels, including bare metal repair to bonnet needing primer filler application. Includes application, flash-off and drying times.

MAXIMUM ENERGY SAVING

This is the best performing system, which lets you dry entirely at 40°C or ambient air temperature without compromising on quality. That means savings of up to 70% on energy costs.

The new clearcoat in the Ultra Performance Energy System.

- CC6750 Ultra Performance Energy System Clear
- Cromax® Pro Basecoat
- PS1081 - PS1084 - PS1087 Ultra Performance Energy Surfacers

AN AXALTA COATING SYSTEMS BRAND

TAKING PERFORMANCE TO NEW HEIGHTS

PAINT MORE CARS WITH LESS ENERGY

Take refinishing to a higher level with our new CC6750 Ultra Performance Energy System Clear. Thanks to revolutionary resin technology, you'll save time and energy by drying quickly at 20°C or 40°C. Flexible application in 1.5 or 2 coats, along with great vertical stability make it easy and safe to use.

SET YOUR BODYSHOP POTENTIAL TO 'MAX'

01 SPECIALLY FOR FAST DRYING AT LOWER TEMPERATURE
Can be dried at lower temperatures: 10-15 minutes at 40-45°C or 30-55 minutes at 20°C - reducing energy consumption.

02 EXCELLENT VERTICAL STABILITY
For reliable and professional results.

03 IMPROVED FILLING CAPABILITY
Save time and reduce polishing effort with improved dust/dirt particle coverage. Achieve very good overspray absorption.

04 FLEXIBLE APPLICATION IN 1.5-2 COATS
CC6750 clearcoat is so flexible, it can be optimally adapted to match OEM structure.

05 EXCELLENT CURING PROPERTIES
Vehicles can be taken out of the spray booth after only 10-15 minutes at 40-45°C. After cooldown the surface is already hard enough to reassemble and polish. That increases your throughput considerably.

06 EASILY TINTED AND FLEXIBILISED
Can be easily tinted for use in special OEM colours. Simply add AZ9405 Elastic Additive for use on plastic parts.

07 BASECOAT ACTIVATION NOT NEEDED
When working completely in the Ultra Performance Energy System, Processing is even more efficient as the Cromax Pro Basecoat does not need to be activated.

*Fast drying
Outstanding Quality
Use less energy*

CC6750 Ultra Performance Energy System Clear is part of our revolutionary Ultra Performance Energy System and has been designed to improve workflow in your bodyshop. The CC6750 clear is easy to use, dries quickly and allows you to increase vehicle throughput. Drying at the low temperatures of 20°C or 40°C saves you considerable energy costs. Good filling power and excellent vertical stability ensure first-class results.

- ✓ Speed-up your workflow and finish more vehicles each day
- ✓ Reduce energy costs by drying at a low temperature
- ✓ Demonstrate your green credentials with reduced CO₂ emissions
- ✓ Open up new revenue streams by offering your customers a premium repair with same-day vehicle returns – or return within just hours.
